Company Profile

The **SEVERIN** company is a leading manufacturer of indoor and outdoor tabletops for the hospitality, residential, garden and leisure industries. The production located in Ense (Germany) focuses on processing materials made of wood and plastic.

The Name Severin has stood for quality for several generations. Starting with a traditional carpentry in 1936, the Severin company further developed from a wood-processing craftsman's establishment, founded in 1955, to a world-class supplier to the furniture industry, combining nowadays tradition and innovation.

Our company maintains a long-term partnership with its customers and suppliers all over the world.

Manufacturing - our key benefits

- ★ Use of high quality material
- ★ Documented controls on incoming goods (raw material)
- ★ Efficient production processes with the highest standards of quality
- ★ Continuous monitoring procedures
- ★ Extensive training of all staff members
- ★ Thorough preparation of orders
- ★ Testing of end products
- ★ Competent technical advice
- ★ Production fulfils all the requirements of DIN EN 438 (Compact-Exterior) and DIN EN 438 -3:2005 for HPL (Lamidur)
- ★ Regularly tested, certified and audited by the TÜV Rheinland test institute (SEVELIT)
- ★ Sustainability: CARB (California Air Resources Board) certified (DUROLIGHT PLUS)

New warehouse construction

We recently completed the construction of our new 1500 m² (16,200 ft²) state-of-the-art warehouse on the company's premises in Ense. The new facility is used for the storage of manufactured products and raw materials. Furthermore, it will provide us with a superb space for a more efficient packaging of our products. This new building offers two fully automated truck docking stations for fast loading.

Our product portfolio

Our portfolio is specialized in high quality tabletops for both outdoor and indoor use. Nevertheless, some of our products combine the style and design of interior furniture with the practical durability and resistance of outdoor furniture.

These versatile indoor-outdoor tabletops can be used in any indoor ambiance with the benefit of combining outdoor and indoor design whilst meeting current requirements of the hospitality and catering industry.

Our product key benefits

- Stable and highly resistant
- Elegant design in line with current trends
- Weather-proof (outdoor tabletops)
- Resistance against UV rays (outdoor tabletops)
- Heat-resistant (fulfils requirements of DIN EN 438)
- Resistance to scratching, abrasion or impacts
- Extremely durable
- Excellent price-performance ratio

DUROLight PLUS & WOODstyle

Light indoor tabletops with trendy design

The indoor **DUROLight PLUS** tabletop presents a very elegant cubic design in line with current hospitality industry trends.

The honeycomb structure enables a perfect balance between low weight and exceptional quality, durability and robustness.

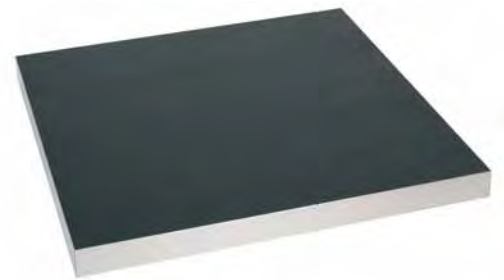

DUROLight PLUS has been especially designed as an indoor tabletop for professional use in hotels, restaurants, bistros and at catering events.

DUROLight PLUS
Vintage Pine

Key facts at a glance

- ⇒ Very lightweight tabletop
- ⇒ Special technology developed to provide high surface resistance to heat, scratches and impacts (DIN EN 438)
- ⇒ Innovative manufacturing process
- ⇒ Strong ABS edge
- ⇒ Excellent price/performance ratio
- ⇒ Wide range of dimensions and decors with different surface textures
- ⇒ Very-easy-to-clean surface
- ⇒ Easy fixing of all type of table bases without use of inserts

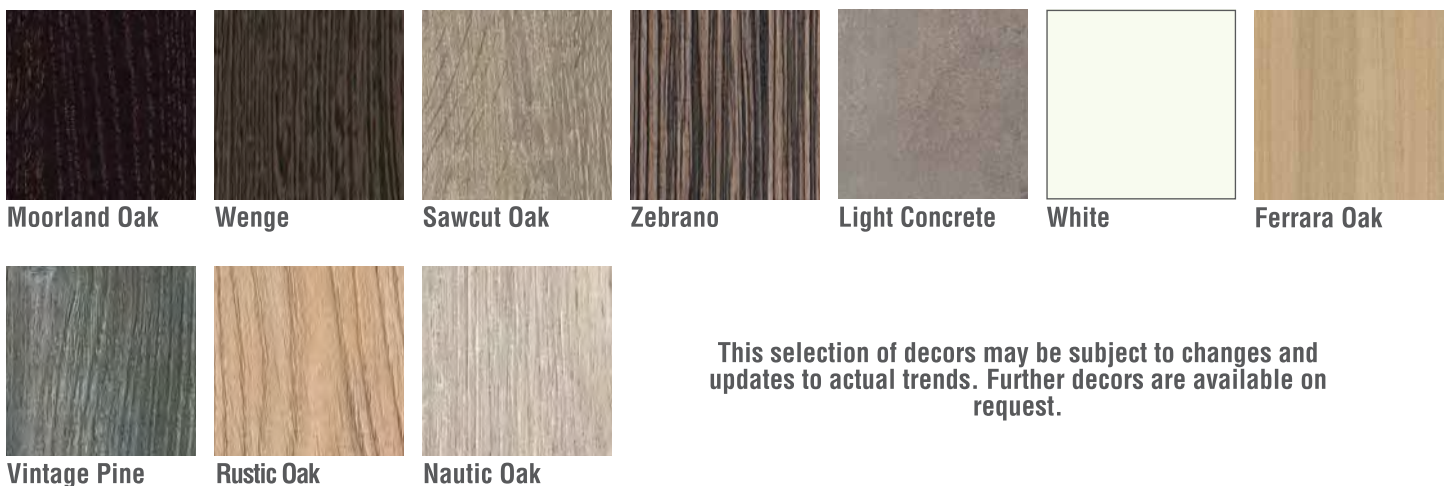

DUROLight PLUS Moorland Oak
with aluminium edge

Sustainability

- ▶ CARB (California Air Resources Board) certified, meaning a significant reduction of formaldehyde concentration in production
- ▶ Saving of natural resources thanks to the reduced using of chipboards (overall thickness 48 mm with 2 chipboard cover layers of 12 mm)

Our trendy collection of 10 decors offers a perfect choice for many different ambiances

NEW

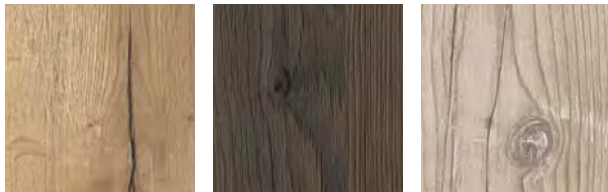

DUROLight WOODstyle - the new revolutionary trend with solid wood effect

The new **DUROLight WOODstyle** decors provide a revolutionary visual and touch effect.

The deep brushed structure of the tabletop surface in combination with the two matching edges of end-grain look make them hardly distinguishable from real wood tabletops.
